

March 2019

IMPORTANT NOTICE!

What: FREE Fire Safety Inspection of each unit. The Home Owner's Association paying!

Who: Firetrol Protection Systems (located in Oklahoma City)

When: Two dates and times for your convenience:

(First) April 9th, 2019 10:00 AM to 12:00 PM or (Second) April 11th, 2019 5:00 PM to 7:00 PM

A short walk through will be required. Animals must be held/restrained while inspector walks through to visually inspect the sprinkler fire heads in your unit. He or she will be looking at nothing else..no need to clean ...!

Why: Our units have not been inspected for some time. The riser boxes on the outside of each unit will be inspected as well for water flow/pressure. This inspection MUST be done! It has not been done for years and in order to have a green tag for compliance, each unit must be looked at. If not, the Fire Marshall will tag us, the Owner may be responsible for the special date and time to re-inspect and additional fees will be incurred to owner. We do not want this to happen!

Please help to make our property and your unit safe!

If you have watched the recent News Reports, there have been many needless fires in our area. We are very lucky to have sprinklers in our units, but if they are not properly maintained and inspected there could be a danger of malfunction leading to disaster.

****Additional note: You will be asked to sign off that your unit was inspected so that Firetrol will know which units they do not have to revisit.***

Thank you in advance for your much-needed help to be Safe at Commons at Quail Creek!
